A sturdy temporary fence with good value for money

An affordable temporary fence for various situations

With its robust construction and attractive value for money, the temporary fence M400 is ideal for use on construction sites, events and other temporary projects. Indeed, this temporary fence is a cost-effective choice, yet very stable. The fence offers a long lifespan, making it suitable for various applications. Moreover, you can add a personalised nameplate to this temporary fence.

- Easy to assemble
- Good value for money
- Available in several variants

A temporary fence that is easy to assemble

The M400 temporary fence is a sturdy temporary fence, designed to effectively demarcate and secure construction sites and other temporary projects. As the fence is made of pre-galvanised steel, it has no sharp zinc residue. This ensures safe handling and easy assembly, allowing one person to install the temporary fence. Especially with the help of the Heras Fence Lifting Tool, mounting our temporary fences is very easy.

Optimise the M400 temporary fence with extra options

Besides this basic version, the M400 temporary fence is available with extra options. You can choose the mobile fence M400 with corner reinforcement (welded corner brackets). These strong corner brackets extend the lifespan of a temporary fence considerably. You can also choose a horizontal central tube for extra strength. Do you want to install the fence line quickly? Choose one of the options with a hook-and-eye system, making it easy to connect the temporary fences. Do you have other requirements or would you like to order the M400 temporary fence directly.
