The perfect addition to your fencing line

A compact and practical temporary fence

The fitting element from Heras Mobile is the ideal solution for filling up your fence line. Measuring 2m x 2.2m, this temporary fence is more compact than the standard variant of 2m x 3.5m. This makes it easy to assemble and move this fence, which ensures that this temporary fence is suitable for construction sites, events and other temporary locations where flexibility is important. The fence can be used as a padding when the 3.5m wide fence does not match the number of metres.

- Flexible use
- Easy transport and storage
- Compact size

A stable temporary fence that is easy to transport

Thanks to its smaller size, the construction site fence is easier to handle and fits effortlessly on smaller trucks. This facilitates transport and storage of the fence, allowing you to move faster on the construction site or other temporary locations. Moreover, the width ensures that the temporary fence catches less wind than a standard fence, which improves stability.

Versatile deployment for any situation

The versatility of this fitting panel makes it a valuable addition to your stock. Whether you are going to use the fence as a padding in the fence line or close off the entire site, this temporary fence is a reliable and practical solution.
