Strong Round Top temporary fence that hinders overclimbing

The safest Heras temporary fence as a Round Top version

Looking for robust temporary fencing? This Round Top fence is a good choice for those for whom safety on the construction site or event venue is very important. Each mobile fence consists of a frame containing a mesh. The mesh of this Round Top temporary fence is distinguished by its narrow mesh size (40 mm). Thanks to the fine mesh mat, it is difficult to climb over this fence, which helps prevent unwanted access to temporary sites.

- Without protruding sharp points
- Difficult to climb over
- Extra-strong frame with rounded top corners

Smart and user-friendly design

The rounded top corners not only provide a friendly appearance, but also make the fence stronger: there is no weld that can break. Moreover, the frame is fully welded at the bottom and features reinforced corner pieces for maximum strength. This makes this Heras temporary fence ideal for use on any construction site. In addition, the mobile fence is safe to use (no sharp zinc residue) and can be installed by one person. Especially in combination with the handy Heras Fence Lifting Tool, you will mount a sturdy fence line in no time.

Temporary fencing that also stands out

In addition to being functional, this fence is also suitable for optimal visibility. There is room for a personalized sign, which is visible on both sides of the fence. This makes the Heras temporary fence not only a practical choice, but also a means of making your company name highly visible. Choose the combination of appearance, strength and safety and opt for the Round Top mobile fence from Heras Mobile. Do you want to know more? Get in touch with us.
