## Low-cost temporary fence for robust site fencing

### A budget-friendly temporary fencing for intensive use

The Heras M300 mobile fence with corner reinforcement is an affordable solution for those who need a little more robustness. Thanks to the welded corners, this fence remains in good condition even during intensive use. This makes the temporary fence suitable for building sites where fences are often moved or reused. A smart choice for those looking for a stable and cost-efficient fence. Keep in mind that it is easier to climb over this fence due to the wider mesh size (100 mm).

- Reinforced corners for long-term use
- Can be ordered directly
- Withstands more intensive use

### More security on the building site

The reinforced corners reduce wear and tear and deformation of the fence. As a result, this mobile fence lasts longer than standard variants without corner reinforcement. The pre-galvanised finish also prevents sharp zinc residues. This makes the temporary fence safe to handle. You can easily (dis)assemble this fence - especially in combination with the Heras Fence Lifting Tool.<br>

### Buy your Heras temporary fences directly

Do you want to buy this affordable temporary fencing? The Heras M300 mobile fence with corner reinforcement can be ordered directly. Besides this version, this type of fence is also available as a standard version without corner reinforcement. Are you looking for other temporary fencing? That is also possible! At Heras Mobile, we have different types of construction site fencing in our range.
