The indestructible mobile fence for safe infrastructure projects

The most robust 1-metre-high temporary fence

During roadworks, traffic diversions and other infrastructure projects, safety is paramount. This applies not only to road users, but also to personnel on site. The Heras M55 mobile fence, with a height of 1 metre, is specially designed for situations where safe temporary fencing is essential. Thanks to the heavy-duty tubes and a sturdy steel mesh, this fence offers optimal usability.

- Indestructible construction
- Can be ordered directly
- Ideal for elevation on concrete blocks

Perfect for elevating concrete barriers

This hand-welded and post-galvanised fence was developed for intensive use in tough conditions. Whether placed directly on the ground or used as an additional elevation on top of concrete barriers, the M55 mobile fence guarantees sturdiness and reliability. Its solid design makes the fence ideal for use in long-term projects.

Reliable choice for infrastructure projects

When every detail counts and safety is non-negotiable, choose the Heras M55 temporary fence. This quality fence protects work sites in a way that meets the highest standards. For contractors and public authorities, the M55 fence is therefore the solution for temporary fencing with security and safety as key factors. Would you like to buy this construction fence?
