A clear demarcation for a safe working area

Temporary barrier for optimum safety

This temporary barrier is designed to create a clear and highly visible demarcation during roadworks and other temporary work situations. The bright red colour with white details ensures that workers, road users and pedestrians are alerted to dangerous situations or obstacles. The barriers are lightweight, easy to move and quick to install. This makes them flexible to use when the situation on site changes.

- Striking and highly visible colour
- Versatile
- Easy and quick to install

Limit risks with clear demarcation

These barriers allow you to mark work zones and hazardous situations. They help to limit the risk of falls, for example near trenches, excavated areas, holes or open pits. In addition, these red barriers make it easy to create diversions or temporary lanes that guide drivers through the areas in question. By clearly demarcating work zones, you contribute to a safe and orderly environment. Would you like more information? Please contact us.
