### Strong tube-in-tube fence

#### Tube-in-tube fence for a solid construction

Our mobile fence with tube-in-tube technology is designed for reliable perimeter security on construction sites, events or temporary zones. The tube-in-tube technology adds strength without complexity, while the sharp pricing makes it a smart choice. Each wire is welded directly to the tubular frame, ensuring maximum strength and a consistently taut appearance of the mesh panel.

- Tube-in-tube construction
- Every wire is welded to the tube construction
- Robust tubular frame for long-term use

#### Efficient and long-lasting site security

Built for repeated use and fast deployment, this fence is ideal for demanding environments. Its robust structure resists bending and damage, helping to keep your site safe, compliant, and tidy.
