Lightweight plastic fence footing with forklift slots

Lightweight recycled footing – quick to install, stable in use

This 18 kg plastic fence block is made from recycled plastic and features a practical central gap. Its low weight makes it easy for one person to handle without compromising on stability.

- Easy to stack
- With forklift slots
- Lightweight, quick and easy to use

Durable, stackable and easy to handle

This plastic fence block is made from fully recyclable plastic, fused into a solid and robust unit. The plastic fence block is around 40% lighter than a concrete footing, but the sophisticated design means it can act as a very stable foundation. The material is long-lasting, low-maintenance and remains visually presentable even under heavy use. Its design allows for easy stacking, and the integrated forklift slots make loading and unloading fast and efficient. In short: a practical and sustainable choice among fence footings.
