Compact base plate for stable fence lines on hard surfaces

Compact, stable and ideal for urban use

This 50 x 25 cm base plate is a smart alternative to traditional fence blocks. Simply slide the fence posts over the two upright tubes. The pre-drilled holes allow you to anchor the plate with concrete screws, making it ideal for use on asphalt or concrete. Perfect for inner-city environments or high-traffic areas.

- Can be fixed with concrete screws for extra stability
- No protruding parts on the outside
- Alternative to traditional blocks

Safe and pedestrian-friendly

Because the base plate lies flat on the ground, the risk of tripping is minimal. When used with low temporary fencing, it provides a neat and safe guide for pedestrians and cyclists. This modern, space-saving and functional solution is ideal for temporary fencing in busy public areas. Would you like more information or a quote? Please contact us.
