## Unique key for maximum control over your fencing

### Access only for those you authorise

This specially developed High Security Key is essential when using secure fence clips. Thanks to its unique fit, the key is exclusively compatible with Heras Mobile High Security Couplers. These couplers offer the most secure way to connect any type of temporary fencing. The site manager controls key distribution and no longer needs to check the entire site daily for open panels.

- Only available with the purchase of HS clips
- Exclusively fits Heras Mobile nut protection
- Increases security and prevents misuse

### Secure access without daily inspections

Because only authorised personnel have the matching key, there's no need for constant inspection of whether fences have been opened or moved. The key offers a safe and reliable solution for construction sites where access control is essential.
