The hinge for converting a Heras mobile fence into a gate for semi-permanent set-ups

From fence panel to practical swing gate

The strap hinge lets you quickly convert a temporary fence panel into a functional swing gate. In combination with two strap hinges and a fence wheel, a standard panel can serve as a gate. When applied to two panels, you can create a 7-metre-wide opening, wide enough to allow truck access on construction sites.

- Quickly transform a fence into a gate
- Suitable for gate openings up to 7 metres
- Specially designed for semi-permanent installations

Effective access solution

This strap hinge is robust and easy to install, offering a stable and secure entrance without the need for complex setup. For added security, the gate can be locked with the Heras gate lock. This makes it a smart and flexible solution that combines accessibility and safety on any construction site.
