## The easiest way to create a swing gate from temporary fencing

### Quickly create a swing gate

With a hingeset and fence wheel, you can easily turn two standard temporary fencing elements into a functional swing gate. This setup provides a simple 7-metre-wide access point, ideal for construction site vehicles. The hingeset can also be combined with a pedestrian gate, giving you full flexibility in designing your fencing layout.

- Easily create a swing gate from fence panels
- Up to 7 metres wide for vehicle access
- Can also be combined with a pedestrian gate

### Safe and practical access

The hingeset offers a quick and effective access solution for temporary construction sites. Looking for even more stability and security? Consider a sliding gate system, where the fence glides smoothly along a rail. In both cases, make sure to use a solid lock. The Heras gate lock ensures a secure closure without the looseness often caused by standard padlocks.
