Essential Y-shaped barbed wire holder

Extra height and maximum deterrence

The Y-barbed wire holder is a smart upgrade for reinforcing the security of your temporary fencing. The arm slides easily into the vertical post of the fence or can be attached using a coupler. Barbed wire or Concertina can then be stretched across the top of the fence. Thanks to the Y-shaped design, the wire extends on both sides of the fence, adding up to 50 cm of extra height and creating a powerful deterrent effect.

- Adds up to 50 cm of additional height
- Compatible with Concertina and barbed wire
- Quick and simple installation on fence posts

Effective enhancement for your fence line

This Y-barbed wire holder together with barbed wire or Concertina makes it nearly impossible for intruders to climb over your fences. The dual-sided wire design provides both a physical and visual barrier, effectively discouraging unauthorised access. Ideal for construction sites, temporary perimeters, and areas where enhanced visibility and protection are required.
