Extra height with a strong visual deterrent

More height and visible deterrence

Barbed wire is a simple and effective way to strengthen the security of your temporary fencing. By attaching two or three strands above the fence line, you can add up to 50 cm of additional height. The sharp wire acts as a strong visual and physical deterrent, effectively preventing climbing or trespassing on your site.

- 250-metre roll
- Adds up to 50 cm of extra height
- Powerful deterrent against intruders

Flexible fencing application

Barbed wire can be installed in several ways. For semi-permanent setups, it is directly tensioned between posts, while for fences placed in blocks, it is typically mounted using barbed wire arms. This makes it suitable for both temporary and long-term site security an affordable, practical, and effective upgrade for any fenced perimeter
