## The right lock for secure closure of your temporary fencing gate

### Secure and tight closure

This stainless steel lock bracket makes it easy to securely close a temporary fencing gate outside working hours. It keeps the fences firmly pressed together, preventing gaps from forming as with a traditional chain lock. The bracket is flexible, widely applicable, and made of robust, vandal-resistant materials for long-lasting use.

- Keeps panels tightly closed
- Flexible and easy to use
- Vandal-resistant and neat

### Flexible and reliable in use

By adding hinges and wheels, you can turn standard fencing into a temporary gate. The lock bracket ensures this gate can be securely closed. Providing a sturdier solution than a chain or padlock alone.
