Create the simplest temporary fence gate quickly and efficiently

Quickly set up a swing gate on any surface

This plastic fence wheel with a 20 cm diameter allows temporary fencing elements to pivot smoothly. Ideal for creating a temporary fence gate on construction sites. Attach the wheel to a fence piece with a hinge, and in no time, you have a fully functional gate. Use two fence pieces for a total opening width of up to 7 metres, perfect for site access by trucks.

- Strong plastic wheel (Ø 20 cm)
- Suitable for all surfaces
- Quick and easy to install

A cost-effective foundation for temporary access

The fence wheel offers a smart and affordable way to provide site access without needing a permanent structure. For secure closure, combine the wheel with the Heras gate lock, which prevents excess play and ensures safety. Whether you're setting up a single gate or a double-wide entrance, this solution gives you flexibility without compromising on stability.
