Make your mobile fences stand out with red and yellow reflection

For temporary fences that need to stand out

In some situations, it is essential that your fence line is clearly visible to pedestrians and road users. This red and yellow reflective strip is the perfect solution for making temporary fences extra noticeable. Thanks to its bright colours and reflective properties, the visibility of your fencing is significantly increased, even in the dark or in bad weather. This strip is therefore ideal for various locations, such as construction sites or road works, to improve safety and visibility.

- Can be assembled immediately
- Weatherproof
- Increased visibility

Quick and easy attachment with tie wraps

The strip has pre-drilled holes, so you can quickly and easily attach it to a temporary fence with tie wraps. Within minutes, the strip is securely attached to the fence. Our standard mobile fences are 3.5 metres wide, while the strip is approximately 1.6 metres wide. This means that the plate does not protrude from the sides of the fence. Make your construction site stand out and comply with safety requirements at the same time with this red and yellow reflective strip.
