Extend the lifespan of your fencing with vertical storage

For the vertical transport and storage of 25 mobile fences

This vertical transport rack safely and neatly stores up to 25 pre-galvanised fences. The fences are slotted vertically over the tubes on both sides of the rack, eliminating the need for bundling. This upright position protects the zinc coating, helping extend the lifespan of your fencing. Thanks to its lightweight and clever design, the rack is easy to handle and stackable.

- Capacity for 25 temporary fences
- Maximum load: 500 kg
- Compact, stackable and user-friendly

Smart solution for transport and storage

This rack is ideal for rental fleets, transporters and contractors who want to store or move their fencing efficiently and without damage. Compared to horizontal bundles, vertical storage takes up less space, promoting a tidier and more organised site.
