## For efficient and secure vertical transport of 30 temporary fences

### Space-saving transport and storage

This Transport Rack-V allows you to transport and store up to 30 pre-galvanised temporary fences in an upright position. Fences of type M300/M400/M450/M500 are placed vertically into the designated slots, keeping them neatly upright without the need for bundling. This storage method protects the zinc coating, helping extend the lifespan of your fencing and keeping everything organised on-site.

- Suitable for 30 pre-galvanised temporary fences
- Compact vertical design saves valuable space
- Stackable for efficient storage management

### Ideal for both storage and logistics

This rack is particularly well suited for rental, transport, and temporary on-site storage. Its smart design keeps fences stable during transport and allows for quick distribution or collection. The stackable steel frame is easy to move and helps maintain an organised and tidy worksite. A practical and reliable choice for any project where efficiency, clarity, and durability are essential.
