## The Arion sliding gate combines optimal flexibility and safety all in one

### Ready-to-use sliding gate for any location

The Arion sliding gate is a reliable and user-friendly access gate for your construction site. Thanks to its prefabricated concrete foundation, this electric sliding gate can be installed quickly and without any additional preparation. The entire structure is robust and comes fully pre-assembled, including infrared, flashing light and hand-held transmitter.

- Electrically operated gate with powerful Cardin drive
- Equipped with Anti-Climb steel mesh for extra security
- No excavation or additional preparation required

### Safe passage of 7 metres

The Arion sliding gate is available with a clear passage of 6 or 7 metres. The electric version is supplied as standard, but manual operation is also possible. Safety strips and photocells ensure that the gate stops automatically when it encounters obstacles, preventing damage to vehicles or people. You can also easily choose between left or right sliding, even on site.
