Double swing gate with extended pilasters for extra stability and safety

Solid double swing gate for long-term use

This double swing gate is designed to provide secure closure at sites where safety and stability are key. Thanks to the extended pilasters, the structure can be anchored extra firmly into the ground, ideal for long-term or semi-permanent installations. The gate leaves swing up to 180° and remain perfectly aligned thanks to continuously adjustable hinges.

- 6-metre clear passage for vehicles
- Solid locking system with internal ground bolt
- Extended pilasters for deeper anchoring

Robust design for long-lasting performance

The strong steel frame and integrated security lock offer maximum resistance against forced entry. The drop bolt engages firmly into the strike plate, making prising the gate open virtually impossible. The gate is hot-dip galvanised for optimal corrosion protection and built to withstand heavy daily use. This swing gate is available in various widths (2x2, 2x2.5, 2x3, 2x4m) with a standard height of 2 metres. Want to know more about Heras swing gates? Feel free to get in touch.
