## Fast and flexible solution for vehicle access

### Smart barrier solution for busy access points

This Heras 6-metre mobile barrier is designed for temporary sites where speed and clear access control are essential. Supplied ready-to-use on a concrete footing, the barrier is easy to operate with a remote control, push button or GSM module. Thanks to automatic operation and the hinged end post, the full passage width is used efficiently and safely.

- Fully pre-assembled on concrete footing, ready to deploy
- Infrared safety sensors prevent vehicle damage
- Automatic operation via remote control or GSM module

### Reliable performance, even under heavy use

A barrier provides a clear separation between public space and your construction site, with the focus on vehicle regulation. Is there a high volume of traffic, do you want to control who enters and exits, and must every individual check in or out? Then barriers are the best solution. The barrier is equipped with a powerful torque motor and PLC control system. Its housing is heated and vandal-resistant, ensuring continuous operation even under tough conditions. Installation requires only a flat surface and a 230V power connection—no cabling is needed. You will receive clear instructions in advance so installation can be carried out quickly and efficiently. During the day, the barrier smoothly regulates access, while at night a sliding or swing gate can be added for full closure.
