M500 pedestrian gate – granting access for people in your fencing line

Smart and accessible solution for temporary sites

The M500 pedestrian gate is perfect for quickly creating an access point for people within a temporary fencing line. Thanks to its clever design, with one side of the tube shortened, the gate swings smoothly over the block without the need for an additional wheel. This makes it easy to add a passage exactly where you need it. The gate is also immediately recognisable as an access point for staff or visitors.

- Smooth swing with practical hinge
- No wheel needed thanks to smart design
- User-friendly solution

Always fits your fencing line

All Heras pedestrian gates are handcrafted and finished with a durable zinc coating. The M500 pedestrian gate is available in different variants and therefore always fits seamlessly with existing construction fences. A reliable choice for anyone seeking an accessible, functional and durable pedestrian solution for temporary sites.
