## Fast and secure folding gate for busy construction sites

### Ideal for locations with limited space

The Wiki Speedgate is Heras Mobile's high-speed folding gate, specially designed for areas where there is no room for a sliding gate. Thanks to its compact build and smart design, the gate opens and closes extremely quickly. This makes it particularly suitable for high-traffic locations such as construction sites, distribution hubs and industrial premises.

- Compact design
- High opening and closing speed
- Quick installation

### Reliable, even under extreme conditions

The gate is delivered fully pre-assembled and features a unique hinge solution with a customised drive system. This combination guarantees smooth operation, even in low temperatures, snow or ice. Its robust design ensures maximum reliability.

### Optimised for safety and continuity

The Wiki Speedgate is equipped with a self-locking electromechanical drive system, magnetic lock and mechanical top catch. This ensures the gate always remains securely closed, even in the event of a power cut. Thanks to its high opening and closing speed, traffic flow is optimised without compromising on safety.
